

Niepoprawne logowanie na stronę internetową – opensource-demo.orangehrmlive.com/

Zrzut ekranu zdanego testu – niepoprawne logowanie się do strony <https://opensource-demo.orangehrmlive.com/>

The screenshot shows the IntelliJ IDEA Run window. On the left, the 'Run' tab is active, displaying a test suite 'zadanie7' with a duration of 11s 258ms. Below it, a single test 'TestUnsuccessfulLoginToOrangeHRMPage' is listed with the same duration. The main panel shows the terminal output for the test. The output indicates that the test passed, but the underlying process (ChromeDriver) was started successfully. The terminal text includes: 'Tests passed: 1 of 1 test - 11s 258ms', 'Starting ChromeDriver 87.0.4280.20 (c99e81631faa0b2a448e658c0dbd8311fb04ddbd-refs/branch-heads/4280@{#355}) on port', 'Only local connections are allowed.', 'Please see <https://chromedriver.chromium.org/security-considerations> for suggestions on keeping ChromeDriver safe.', 'ChromeDriver was started successfully.', '[1614380266.749][WARNING]: This version of ChromeDriver has not been tested with Chrome version 88.', 'lut 26, 2021 11:57:48 PM org.openqa.selenium.remote.ProtocolHandshake createSession', 'INFO: Detected dialect: W3C', and 'Process finished with exit code 0'.

W trakcie uruchamiania testu nastąpiło przekierowanie na stronę – zrzut poniżej.
